Download, Install, and Manage UiPath Academic Alliance Edition 2021.10

About UiPath Academic Alliance Edition

UiPath Learning offers its partner organizations the opportunity to use the Studio software at no charge through a dedicated Learning license, which is free to students and educators alike, for teaching, learning, and research.

- The license entitles the user to access Studio and StudioX, the automation development software application, along with the UiPath Development Robot to allow for testing and execution of the automation.
- The Academic Alliance Edition of Studio is a locked version of the software aligned to the current Studio course resources provided by the UiPath Academic Alliance Partners and UiPath Learning Partners. Moreover, the current UiPath Certified Professional exams are based on this version.
- One license key allows for the activation of the Studio software on 2 different machines.
- The license type granted is Named User, to be applied solely to User Mode installs. Instructions for activating the Academic Alliance Edition license will be provided accordingly.
- Each Academic Alliance Edition license expires after 365 days upon its activation, and it is subject to being extended as long as the Academic Alliance partnership is maintained.

Using the Academic Alliance Edition ensures that you have the appropriate software version installed which aligns with the curricula and hands-on lab materials. This will avoid any disruptions to your learning experience. This will also ensure that projects can be shared between students and educators without software version differences.

If you have installed Studio Community Edition previously, please uninstall it first before installing the Academic Alliance Edition. Failure to do this may result in both editions of the software not working correctly.

If you have previous versions of the Academic Alliance Edition (20.10 or 19.10), please install the new one above it (i.e., no need to uninstall).

1. Download and Install Studio Academic Alliance Edition

Step 1: To download your free copy of the Studio software, open the URL: <https://www.uipath.com/landing/academic-studio-download>. It is a private form designated only for the students and educators who are affiliated with the UiPath Academic Alliance & UiPath Learning Partner institutions.

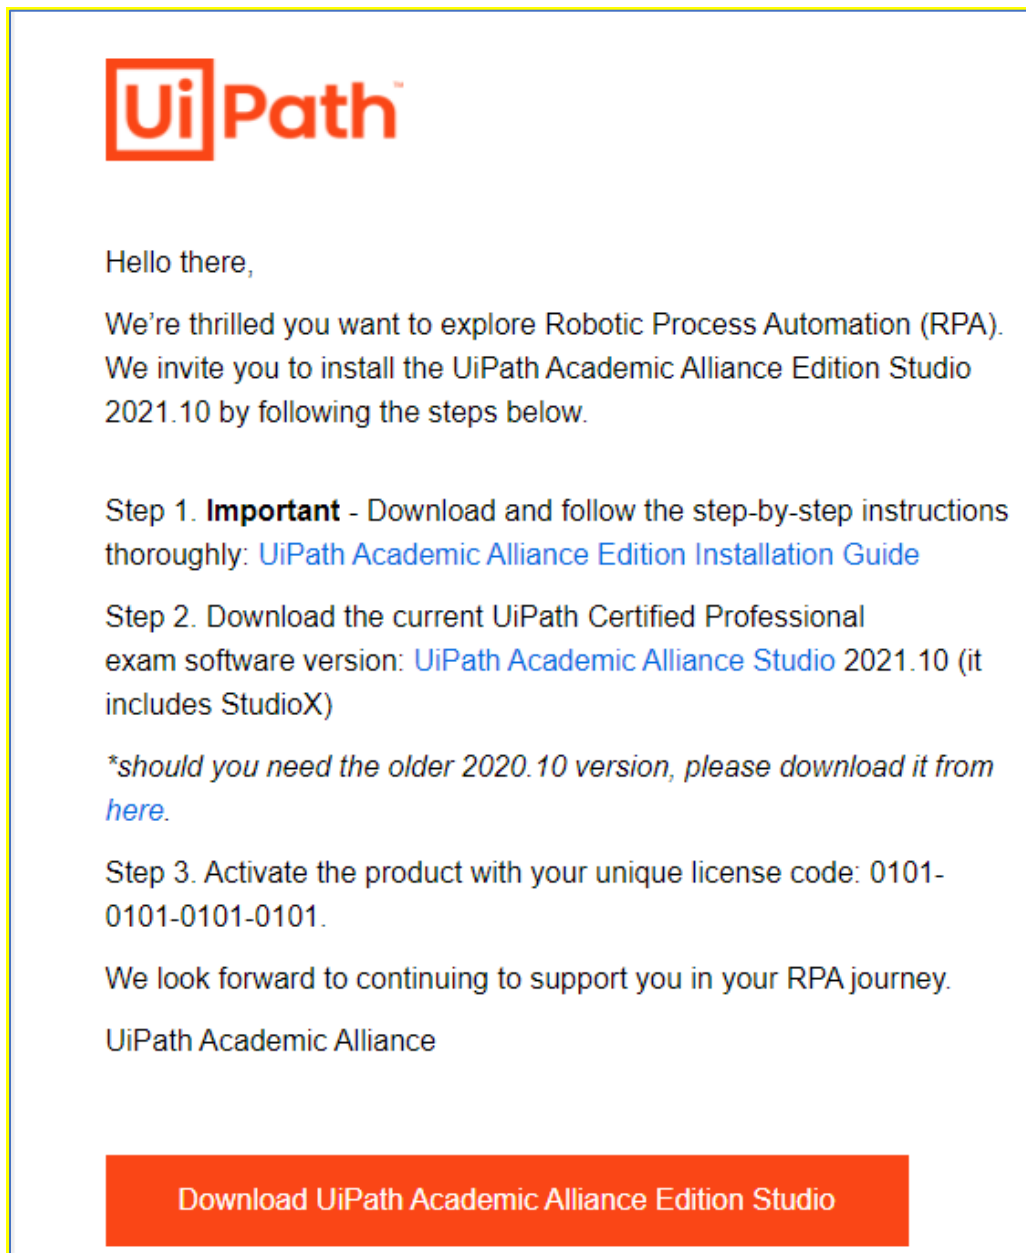

Step 2: Fill in your contact details and choose the institution name as “United States – Coursera Inc”.

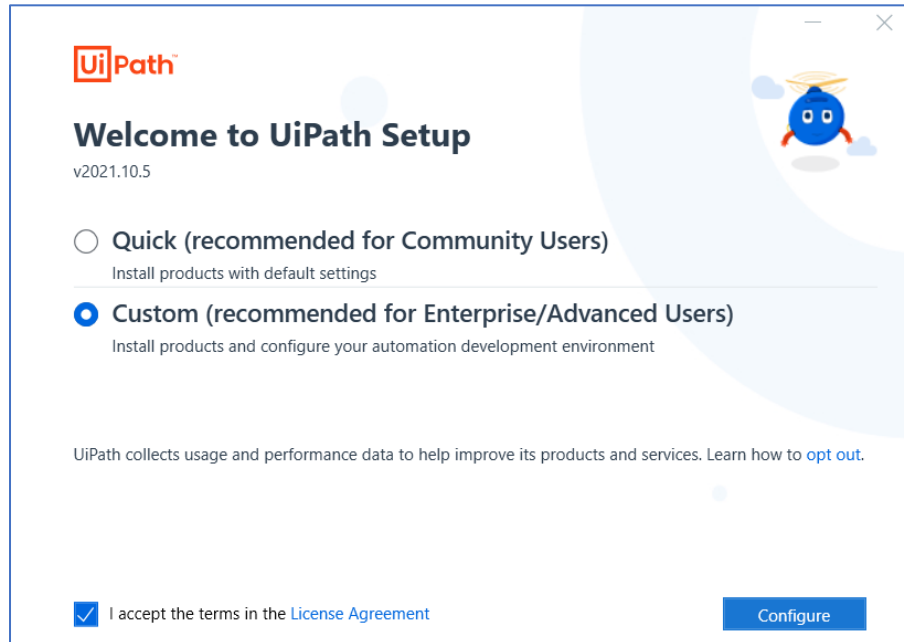

The screenshot shows the 'Get automation skills for a lifetime from UiPath Academic Alliance' landing page. On the left, there's a section titled 'Download instructions' with a link to download the free UiPath Studio—Academic Alliance Edition. On the right, there's a form titled 'Download UiPath Studio for students and educators'. The form includes fields for First Name (Brandon), Last Name (Cooper), Email (brandon.cooper@mail.com), Your Role (Student / Learner), Country/Region (Australia), State (New South Wales), Your institution / organization name (United States - Coursera, Inc., highlighted with a red box), Field of study / work (Robotic Process Automation), RPA Course start (06/08/2022), and RPA Course end (06/07/2023). There are also checkboxes for receiving communications and agreeing to the license agreement, and a 'Request now' button.

Step 3: Click **Request Academic Alliance Edition**. Then, check your email in a couple of minutes. You will receive a link to download the software by email. The email you receive contains the installation guide, the link to download the *UiPathStudio.msi* file along with your dedicated license key.

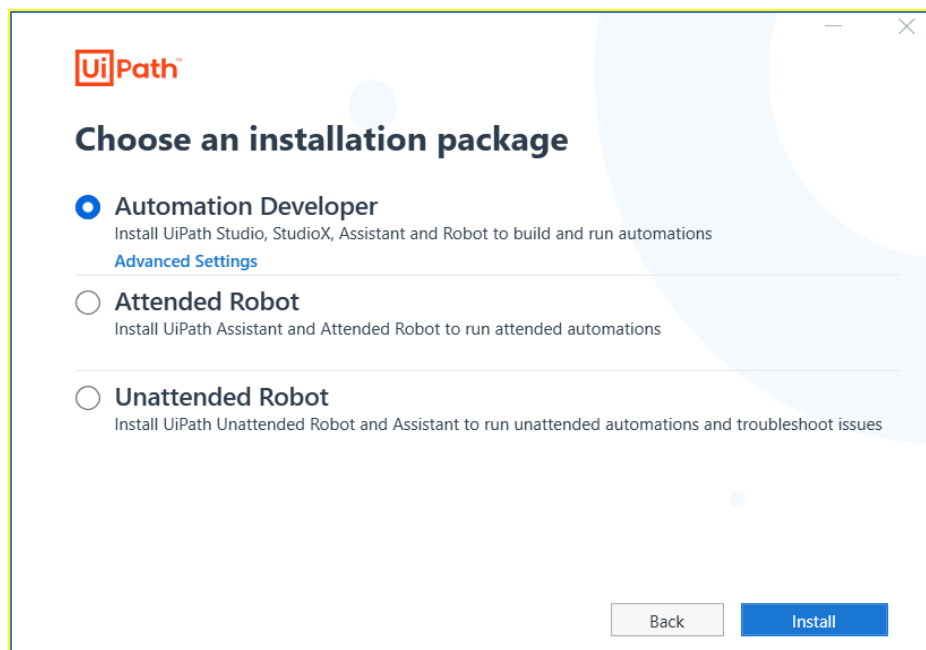

Make sure you follow the steps in the email and carefully follow this guide.

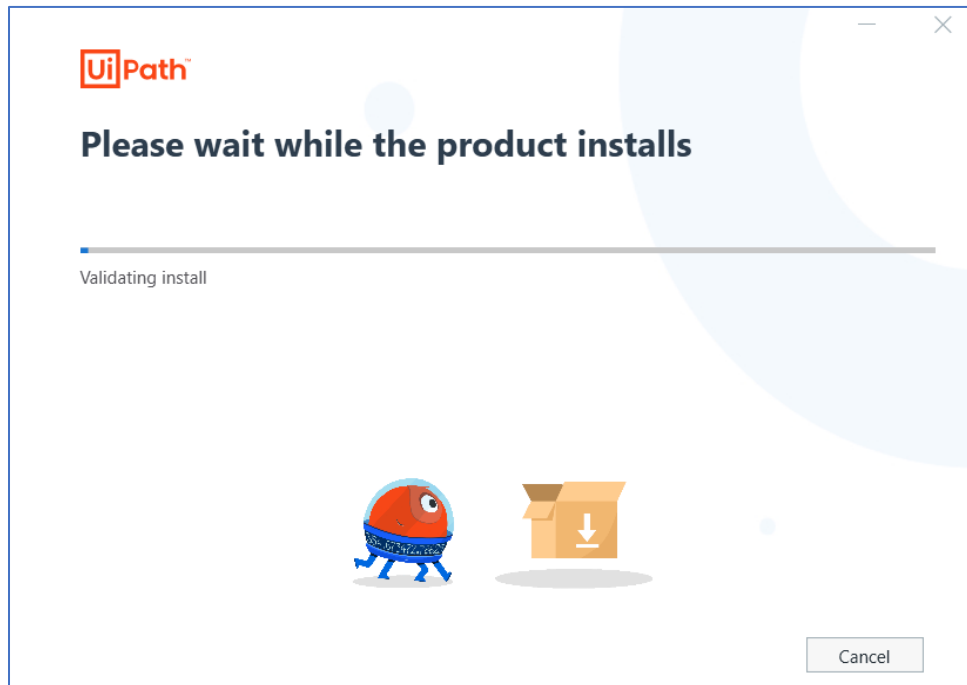

Step 4: The file will begin downloading. Click to open the UiPathStudio.msi once it is downloaded. Click on the **Custom**, then accept the terms in the License Agreement, and click on **Configure**

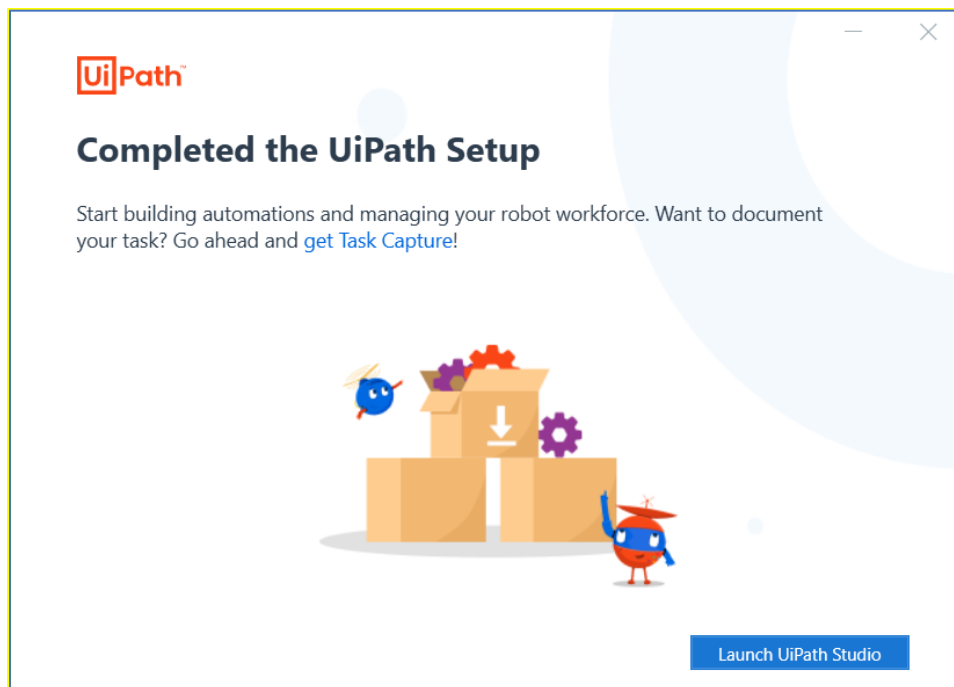

Step 5: Select the **Automation Developer** package and click **Install**.

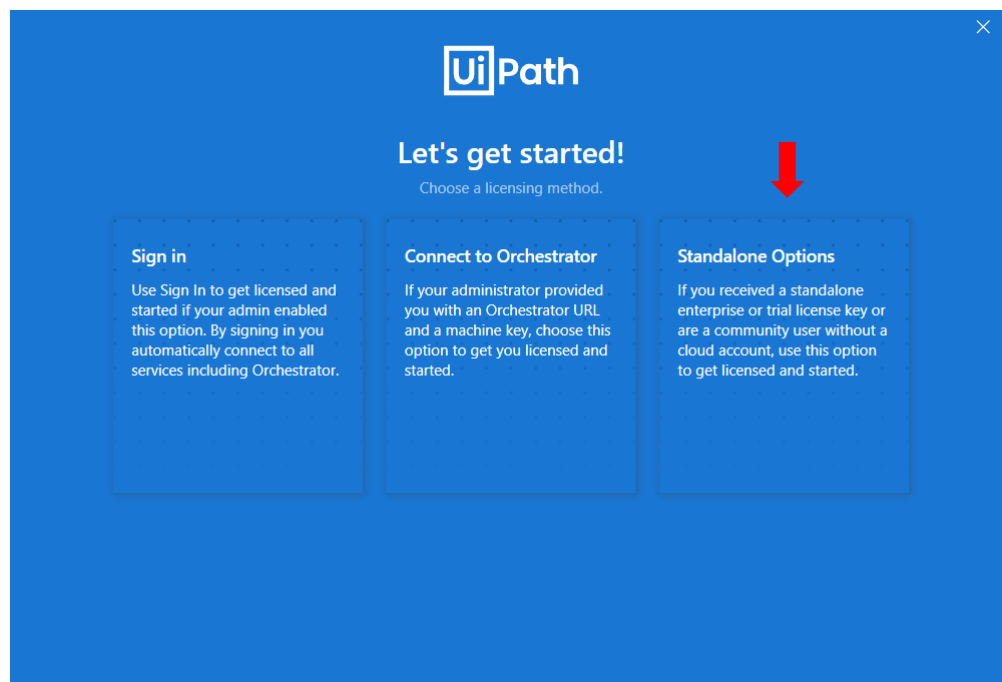

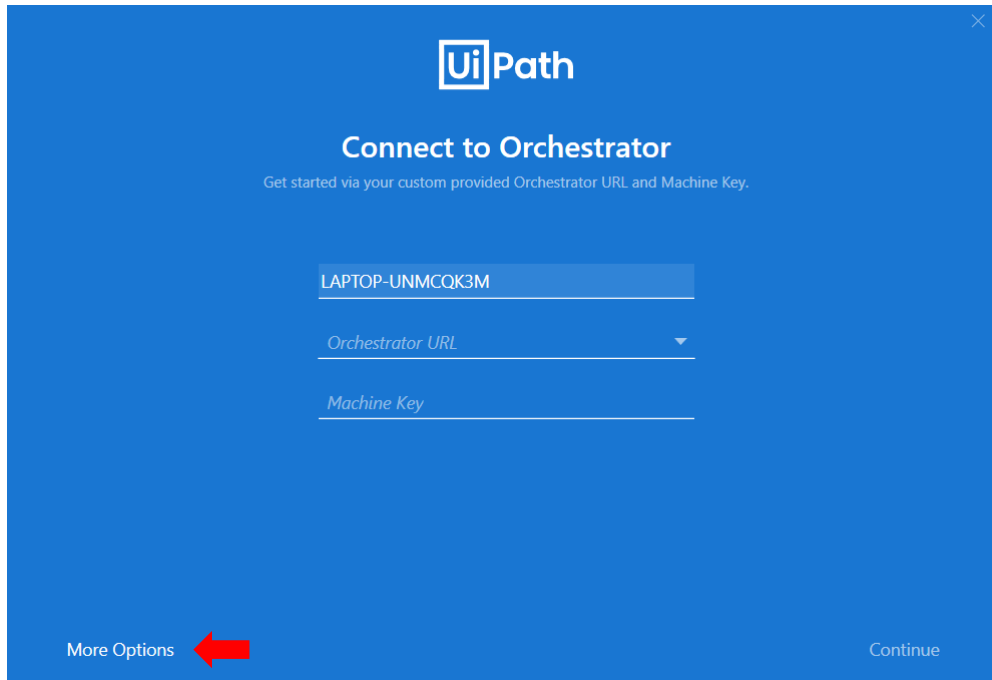

Step 6: The software will begin its installation.

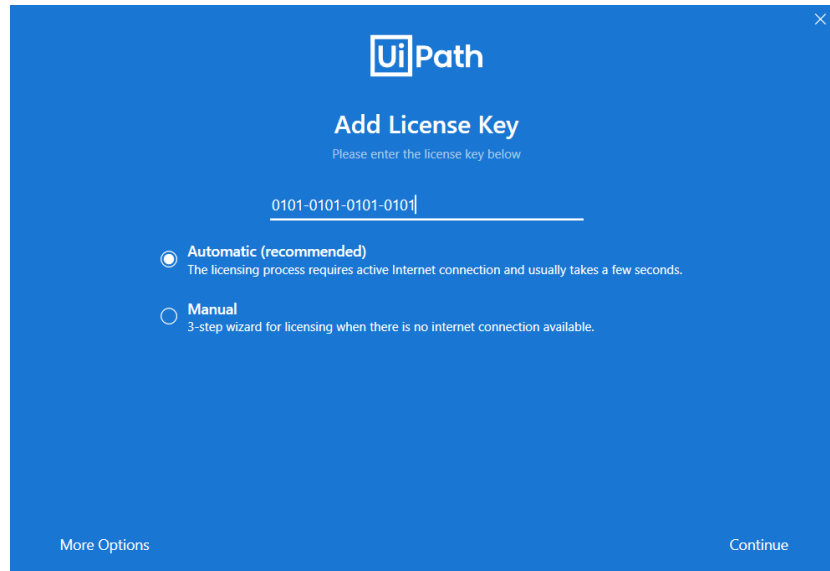

Step 7: Click **Launch UiPath Studio**.

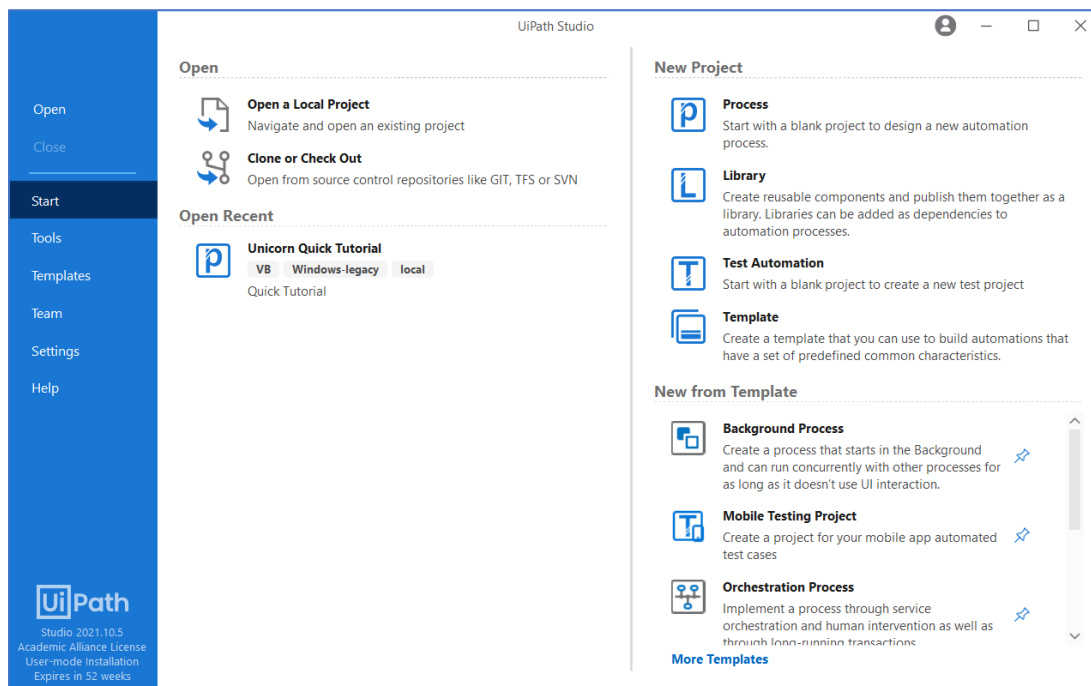

Step 8: In the “Welcome to UiPath Studio” window, click on *More Options* and then *Standalone Options* to activate your dedicated Academic Alliance Edition of Studio with your license key.

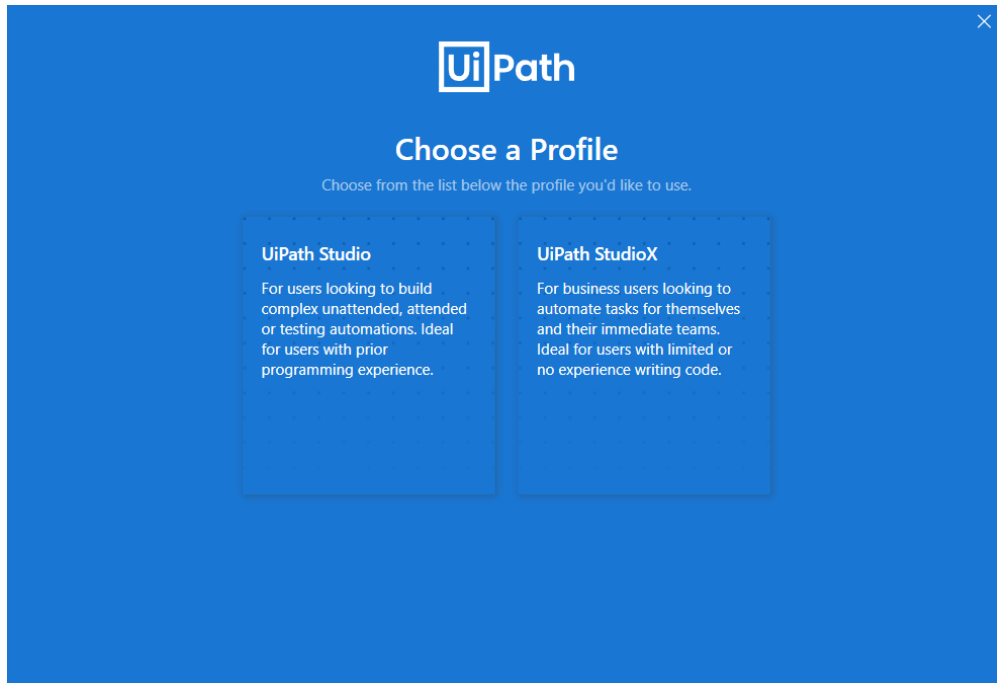

- Step 9:** The UiPath Registration window is displayed
- Enter the **License Key** you received by email, including the dashes.
 - Select **Automatic** activation, but ensure you have an internet connection.
 - Click **Continue**. Your UiPath license is now activated.

- Step 10:** Now, you can start using Studio and StudioX software to create automation workflows.

Step 11: You can switch between the two profiles (Studio or StudioX) at any time by going to Settings – License and Profile – View or Change Profile. Choose whether you want to use Studio or StudioX.

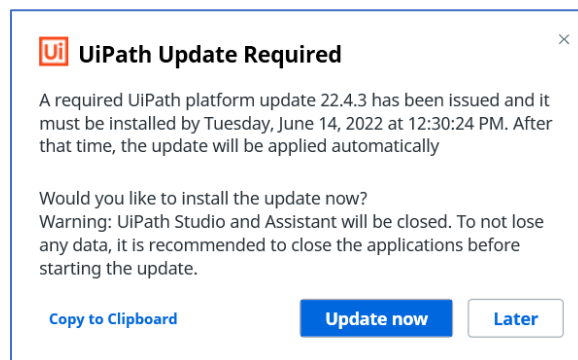

2. Manage Studio Academic Alliance Edition

Once Studio 2021.10 version is installed, you may receive the notification for updating the Studio in the following scenarios:

- After installing Studio 2021.10 version
- While working on Studio 2021.10 version
- After connecting UiPath Assistant with Cloud Orchestrator

Note: The above-mentioned scenarios are only a few of many where you can receive the notification to update.

The notification to update Studio to the latest version is shown below:

In the notification, there are two options:

- Update Now – Selecting this option starts Studio update to the latest version immediately
- Later – Selecting this option starts Studio update to the latest version automatically after 24 hours

Selecting either of the options will update Studio to the latest version available.

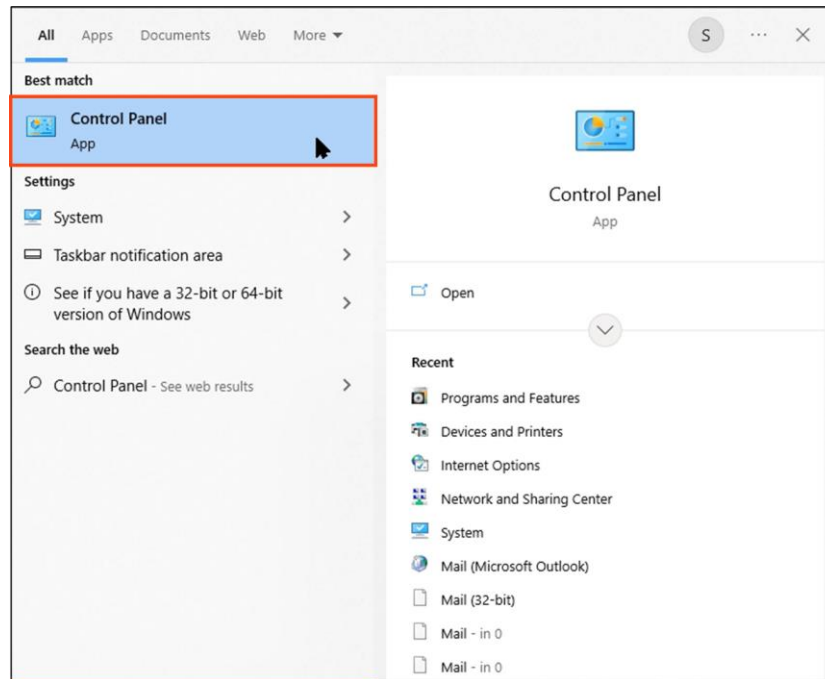

The course is designed on Studio 2021.10 version. Therefore, it is recommended to have the same version throughout the course.

To revert to the previous version of Studio, you will have to uninstall the latest version of Studio from the system and then re-install Studio 2021.10.

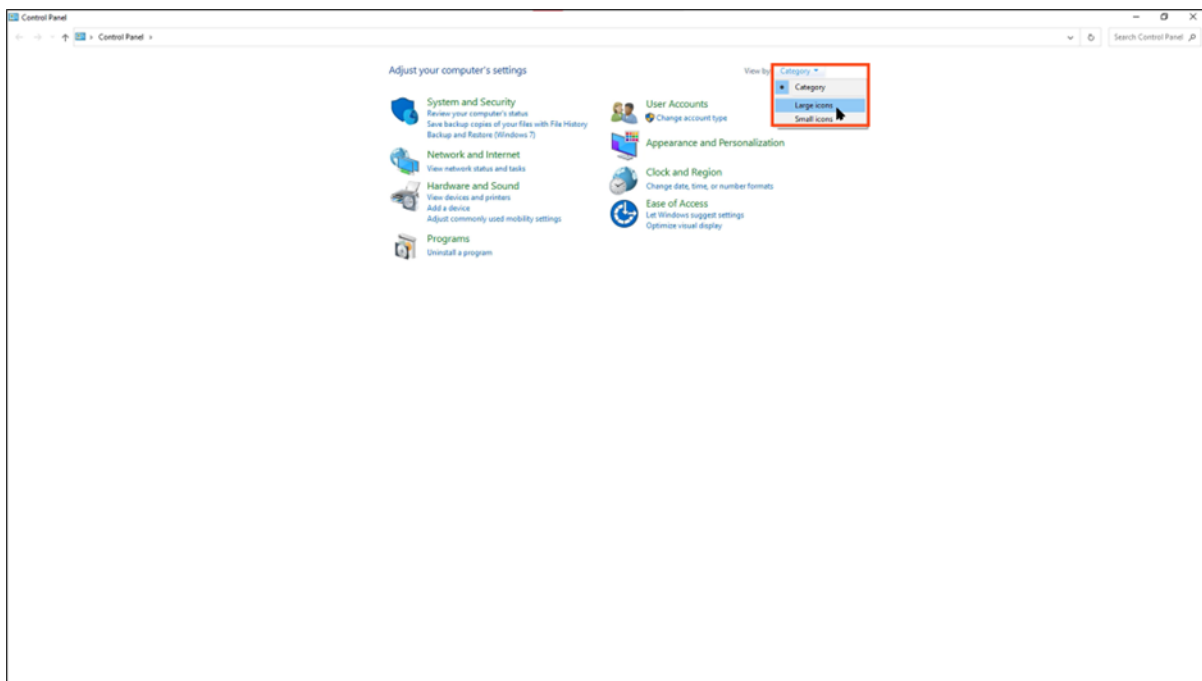

2.1. Uninstalling the latest version of Studio from the system

To uninstall Studio from the system, follow the below-mentioned steps:

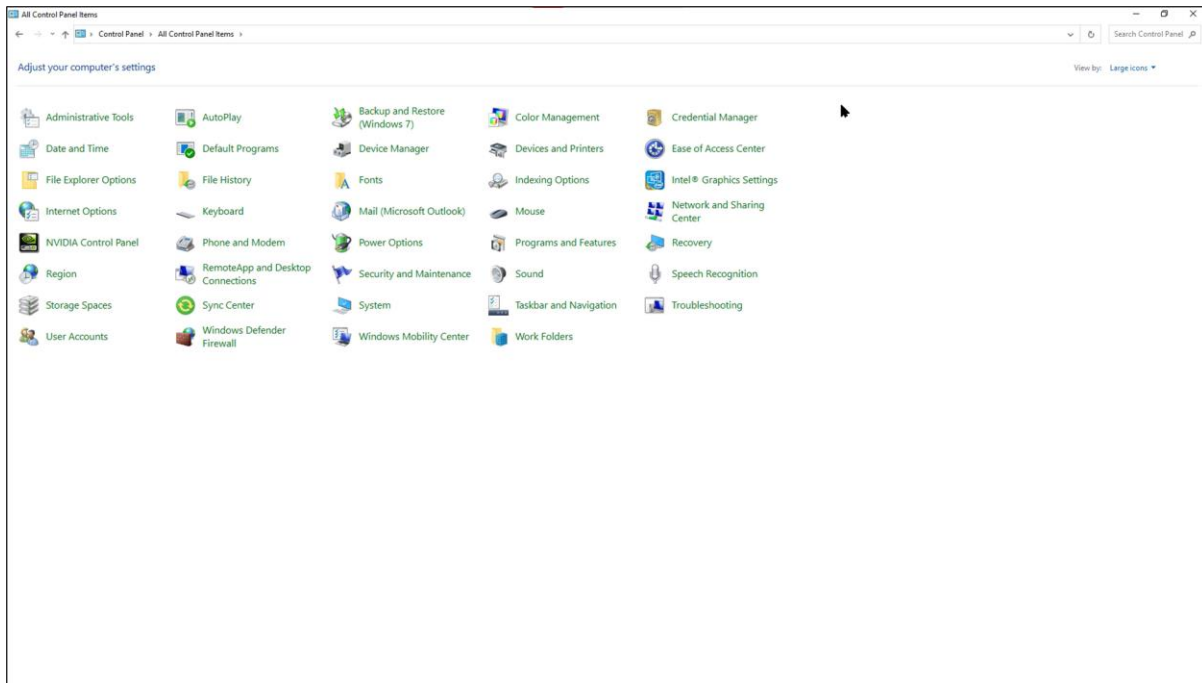

Step 1: Click the Start Menu icon to search for the **Control Panel** application on the system and launch it.

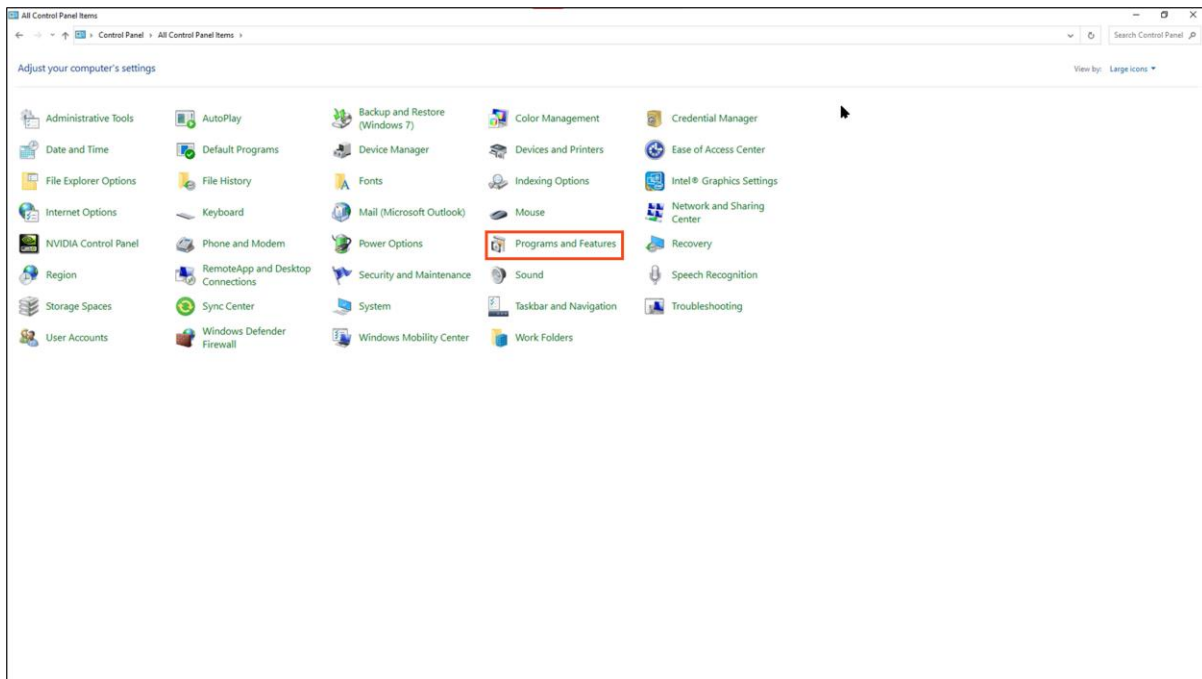

Step 2: Select '**Large icons**' in the '**View by**' dropdown of the Control Panel window.

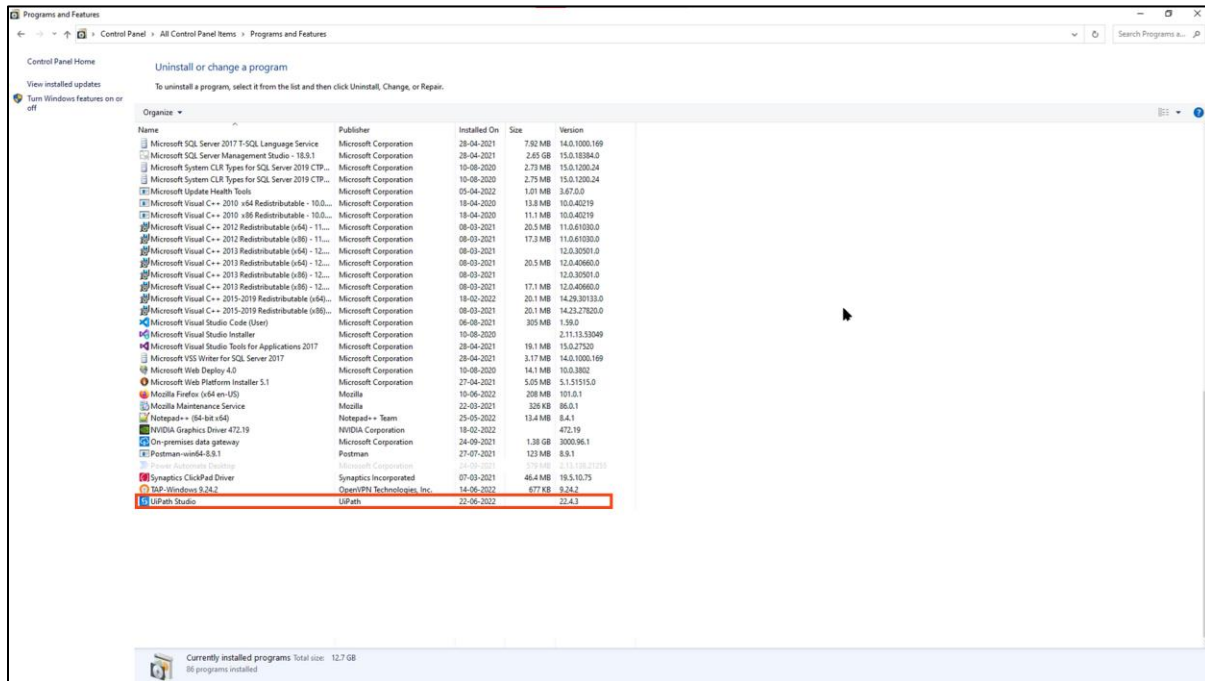

This changes the view of the Control Panel window as shown below:

Step 3: Click '**Programs and Features**' on the Control Panel window to open the list of all the programs installed on the system.

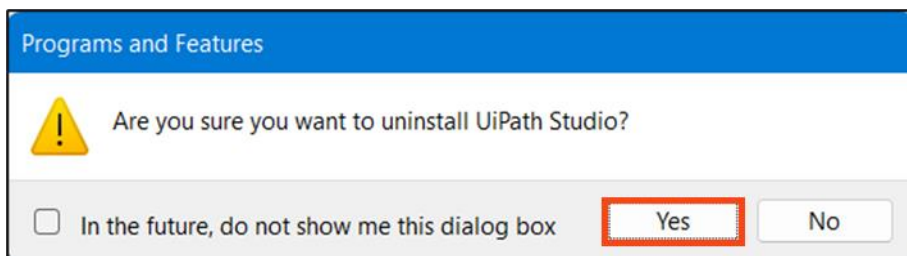

Step 4: Search for 'UiPath Studio' in the list of the installed programs.

Step 5: Right-click the 'UiPath Studio' program and select **Uninstall**. This opens a dialog box as shown in the image below:

Step 6: Click 'Yes' to begin the uninstallation process.

This completes the uninstallation of Studio from the system.

2.2.Re-installing Studio 2021.10 version on the system

To re-install Studio 2021.10, you can refer to the 'Download and Install Studio Academic Alliance Edition' section and follow the mentioned steps.
